

November-14 (Thursday)

As we have done two small project after phase two .we got the final project assignment . as we needed to select project idea with some specific requirements and I also assigned with new member.

November -15( Friday)

As I assigned with new member Joshua we had some discussion about how we going to work together and how we will schedule meeting and discussion ,phone calls etc.

November-16-17( weekend)

We had discussion about finding the idea about project individually and come up together and choose the best one so I started to finding the idea about project and specific requirements for it.i also made list about components we needed .

November -18 ( Monday)

As we had classes whole day we couldn't do any work on Monday but we made sure to work on project from next day.

November -19 ( Tuesday)

We had discussion with each others idea about the project and we took idea from both our project and decided to make temperature measuring station with the help of two sensors I also made shared work contract .

November -20 ( Wednesday)

As we also needed documentation I worked on documentation stuff and proposal and forwarded Joshua to add something from his side to make final copy of contract, documentation and proposal.

#### Comments

As we were not sure about project idea we were waiting for final go ahead from professor . and we also got some feedback that helped us to work on project in incoming week.
